

Draft: September 16, 2013

Proposed Wildhorse Deck Extension Guidelines from the Wildhorse Homeowners Association Board of Directors with input from all Board Members and the original architect go as follows:

1. Any decks must conform to current standards and match existing construction... log sizes, railing design, etc.
2. The deck itself is to be no wider than the house itself... the deck itself will not extend wider beyond the existing exterior surfaces of Wildhorse structures.
3. The deck is built so that the view corridors are not obstructed for any other neighbors.
4. If there is a stairs, it may extend beyond the width of the house, but the stairs need to be designed to blend in with the architecture, i.e. the stair steps run primarily in parallel to the width or the length of the deck.
5. The deck and supporting logs will not extend any further out from the existing decks on the house more than fourteen feet in total. Eight-to-twelve feet have been the average size of actual decking extensions as measured from the living/dining room wall.
6. Deck extensions are allowed only on the living room side of the homes. No deck extensions will be allowed over the driveway side of any of the properties, or on either side of the homes. No wrap around decks are allowed.
7. The above are considered "guidelines" and all final approvals are to be made upon application and site review by a designated representative of the Wildhorse Home Owners Association Executive Board of Directors. Each application will be considered given its specific situation and all final approval decisions will be informed by these guidelines.
